NOTE: We cannot guarantee 100% color accuracy when artwork is printed in CMYK. All raster (pixel-based) images are printed in CMYK and cannot be adjusted. All gradients in any artwork will also remain in CMYK.

Furthermore, if the artwork is converted to Pantone's by our graphics software, we also cannot guarantee 100% color accuracy. It's best, where possible, that Pantone values for provided artwork are supplied to us and have been used in other printed media so that you are aware of the expected outcome. Also, note that colors can appear different on different types of media. For example, colors printed on paper vs fabric can yield a slight color difference. Pantone's are the best way to ensure the most accurate color representation across all medias.
